GENERAL INFORMATION

This listing represents Treatment Providers who contract with the Tennessee Department of Mental Health and Substance Abuse Services (TDMHSAS), Division of Substance Abuse Services (DSAS) and are funded through the federal Substance Abuse Prevention and Treatment (SAPT) Block Grant and recognized by DSAS as a Co-occurring Disorders (COD) Provider.

COD Program Types

Addiction Only Services (AOS) or Mental Health Only Services (MHOS) are programs that provide treatment and recovery services for persons with addictive disorders only or mental health disorders only.

Co-occurring Disorders Capable (CODC) programs are those that address co-occurring mental and substance-related disorders in their policies and procedures, assessment, treatment planning, program content and discharge planning. Even where such programs are geared primarily toward treating substance use or mental health disorders, program staff are able to address the interaction between mental and substance-related disorders and their effect on the consumers readiness to change – as well as relapse and recovery environment issues – through individual and group program content.

Co-occurring Disorders Enhanced (CODE) program has a higher level of integration of substance abuse and mental health treatment and recovery services. These programs are able to provide unified and integrated substance abuse and mental health treatment and recovery to consumers who have unstable or disabling co-occurring disorders. These programs are often indistinguishable as either an addiction or mental health treatment and recovery program.

Continue

This provider listing is organized by region based on the where the home/corporate office is located. Many of these providers take treatment referrals from across the state. Also, many of the providers have treatment programs and satellite offices in locations other than the address listed in the directory. Please contact the provider to determine the locations of their programs, their service area and their co-occurring disorders program capability.

The first step in receiving services is to contact the “no-wrong door” treatment provider and participate in a client screening to determine if the individual is eligible to receive SAPT Block Grant services. If the person is eligible, the provider will arrange for a clinical assessment to determine the severity of the problems and the appropriate level of care. Following the assessment, based upon capacity to serve the individual, the provider will arrange for admission to their program or refer the individual to an appropriate provider.

Northeast Tennessee Region 1

Comprehensive Community Service (*CODC*)
321 West Walnut Street
Johnson City, Tn. 37604
